
Data Collection & Processing

DATA DRIVES EVERYTHING WE DO!

You send it – Your customers send it – We go get it.

Whether data arrives via email, mail, phone or you take advantage of our data extract services, CRT allows you to see your data picture in minutes. Use it to drive a product locator service, generate purchase reminders for your customers, review your company's KPI or create a "dashboard".

Many clients use our custom-designed and developed data extract methodology that dives into remote systems, gathers the required data and loads it into a database. We provide data standardization using CRT developed "Artificial Intelligence" type logic.

- Extract from a Variety of Systems
- Gather Data from Multiple Locations
- Quick Turn-around Time
- Cost Effective
- Data Storage
